

# Sensor Listing Guide

## NEW USER on ETHEREUM / DTX

### 1 Create an Ethereum wallet

Go to [www.myetherwallet.com](http://www.myetherwallet.com) or [www.metamask.io](http://www.metamask.io), and create an Ethereum wallet online.

### 2 Order DTX from SettleMint / DataBroker DAO

Order your DTX and provide your wallet address to [hello@databrokerdao.com](mailto:hello@databrokerdao.com), after which SettleMint / DataBroker DAO will send you an invoice.

### 3 Pay your DTX

Pay the invoice – in euros – to SettleMint / DataBroker DAO.

### 4 Receive your DTX

Upon payment of the invoice, SettleMint / DataBroker DAO will send the DTX to your Ethereum wallet address.

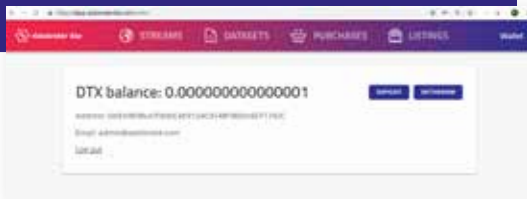

## NEW USER on DATABROKER DAO

### 5 Create a user account on DataBroker DAO

Go to <https://dapp.databrokerdao.com/account/register>, and register (or log in) to get access to your DataBroker DAO wallet.

### 6 Transfer your DTX

Transfer your DTX from your Ethereum wallet to your DataBroker DAO wallet.

Your new user account is now ready and your DTX are loaded.

You can now start using the DataBroker DAO platform to

## ENLIST A SENSOR FLOW

### 7 Click on the 'listings' button

### 8 Click on the 'enlist stream' button

### 9 Follow the wizard steps on the platform

## Technical components

Go to <https://dapi.databrokerdao.com/docs/#/> for the detailed API documentation.
